

PILGRIMS' CROSS CE AIDED PRIMARY SCHOOL

Learning, to make a difference, in God's world

At Pilgrims Cross we want to recognise the unique talents of every child by trusting them to embark on their learning journey into education from the very first moment they enter our classrooms. We want to instil a love for learning, a love for life and a love for each other that shows mutual respect. We want the children to be courageous and resilient to have a go and take risks. We want to create an intriguing and challenging learning environment that sparks curiosity, awe and wonder. We want the children to see us as learners alongside them building that mutual respect. We want to ensure our learning environments are clean, open and organised to allow all children to learn within their own interests. We encourage children to be proactive, purposeful and explorative, while building positive relationships with one another and all of the adults. We aim to provide a bespoke and ambitious curriculum that encourages the child to develop in all areas of the curriculum as well as encourage them to become valuable citizens who are excellent role models within our community.

We boast 2 amazing classroom areas that are open in the middle so children can choose their interest within a large environment. We have the most beautiful outdoor areas for children to explore and learn in. One, the amphitheatre, with an apple orchard, mud kitchen, planting area and small world area, is where we can use scooters and bikes and learn about road safety in a safe and practical way. The other, quieter area, has a space to read and relax in our herb garden as well as construct and role play.

We look forward to meeting and teaching our future brilliant citizens of Andover!
